

TECHNICAL DATA SHEET

ACQUAPIUMA

CHARACTERISTICS

Hygienic softener, specific for padded feather garments.

ACQUAPIUMA is the latest discovery for treating textiles; it gives garments a pleasant and soft touch. Its special formulation protects fibres by covering them with a very thin film, in order to keep fibres separated.

ACQUAPIUMA is a feather disentangling product, especially indicated for windcheaters, down jackets and quilts of eiderdown; it avoids haloes and reduces drying times of 50-60%.

ACQUAPIUMA hygienizes garments if used with DEO-SANY, an antibacterial agent which stimulates the elimination of bad smells.

APPLICATION AND DOSAGES

Recommended dosage in washing machines:

Add 20-25 ml of ACQUAPIUMA for each kg of garments in the last rinse.

CONTENTS/TECHNICAL DATA

Appearance:	Liquid, slightly viscous
Odour:	slightly perfumed
Density:	0,99-1,00 kg/l
pH-value:	3 - 4

Contents: Silicon cationic tensioactives, perfume, stabilizers

DIRECTIONS

Keep the product dry, stored and protected from frost for 12 months.

The above information is only for guidance and we assume no obligation. The quantities to be used and the application methods may have to be modified according to plant conditions and the material to be treated.
